Mr. Phil Greenspan
101 Forge Lane
Marshfield , Ma

5/9/96

Dear Phil,

Thank you for your signal report you sent to our station back in November. The transmitter here is a Harris MW1 solid state 1KW and it feeds a folded unipole antenna at 186 feet, the total tower is 450 ft, our FM is at the top.
During December a storm damaged our antenna and we were off the air a few hours while I climbed the tower to repair a broken cable!(boy was it cold!). The antenna was replaced on Tuesday ,While the workers were on the tower, I used an antenna I made.This was a 60 foot piece of wire tied to a brick and thrown over the top of a telephone pole then connected to a tuning unit. the antenna was fed with 500 watts and worked great! I wonder how far we got out that night. I also enjoy DX as does the YL !. The reciever at home is a Halicrafters SX 42
I am sending a copy of the log for 11/16/95 and some key chains
Best of luck and happy DX
